

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

1. (Cancelled)
2. (Currently Amended) A supplemental seat for a motorcycle equipped with a passenger seat and releasable supports for motorcycle accessories, including:
 - a. a motorcycle passenger seat;
 - a-b. at least one side a pair of side seat cushions being adapted to be disposed on opposite sides of the motorcycle passenger seat;
 - b-c. at least one seat cushion support frame for each side seat cushion, each seat cushion support frame including a side seat support for supporting the side seat cushion and mounting means for mounting the seat cushion support frame to one or more releasable attachment supports such that the side seat support frame is mounted substantially adjacent to the passenger seat and extends laterally from the motorcycle; and
 - e-d. fastening means for securing side seat cushions to the side seat supports.
3. (Currently Amended) A seat assembly for use with a motorcycle having a passenger seat and releasable attachment supports for mounting accessories, comprising:
 - a. a motorcycle passenger seat;
 - a b. a pair of seat cushions, each of the seat cushions being adapted to being disposed proximate to and unattached from the passenger seat;

b c. a seat cushion support frame for each seat cushion, each seat cushion support frame including a seat cushion support for supporting a corresponding seat cushion and mounting means for mounting each cushion support frame to at least one releasable attachment support of the motorcycle such that the seat cushions are positioned adjacent opposite sides of the passenger seat and extend laterally from the motorcycle in opposite directions.

4. (Previously Presented) The seat assembly of claim 3 wherein each seat cushion support frame comprises a tube support having a first and second end, including a generally U-shaped portion defining substantially parallel first and second legs with, a support plate secured between the first and second legs of the U-shaped portion of the tubular support to define a platform for supporting a motorcycle seat cushion, the first and second end of each tubular support designed to engage an accessory support such that the tubular supports are mounted on opposite sides of an existing motorcycle passenger seat with the platform portion of the tubular support extending laterally from the motorcycle passenger seat.

5. (Original) The seat assembly of claim 3 wherein the mounting means consists of flanges having slots of predetermined configuration for engagement with the motorcycle accessory supports.

6. (Previously Presented) The seat assembly of claim 3 wherein the seat cushion support frames are a pair of support plates, each having a generally L-shaped configuration defining a vertical leg and horizontal leg, with mounting flanges depending

from the horizontal leg for mounting the support plate to the accessory supports of the motorcycle such that one support plate is located on each side of the passenger seat.

7-8. (Cancelled)
